AMO

Collection

Magnum[®]
wood flooring

WARNING: The photographs in this brochure are exclusively for illustrative purposes. Wood is a natural material and the photographs shown may not correspond exactly with the product supplied.

AMO collection

The original colouring of the oak wood is affected by the treatment process and is changed to a dark almost black finish. This is due to the special finishing treatment on this product.
The treatment of this product is not liable to be affected by colour change due to UV light.

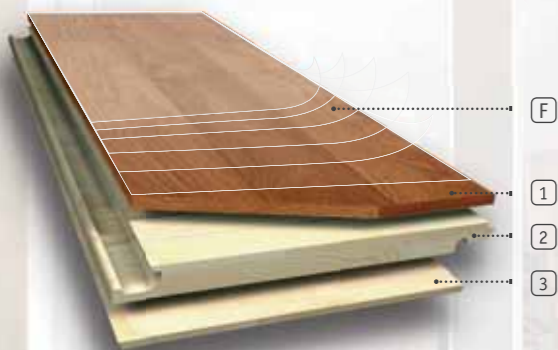

System MagLock

Lock – products with the modern installation system using the glueless MagLock joint.

Ecology

MAGNUM places a priority on complying with the highest environmental standards in our industry. We also apply these same standards to our suppliers. MAGNUM products are made exclusively with formaldehyde-free PVAC, 100% ecological lacquers and natural oils (for OIL surface treatment), and the entire production process is controlled and organised in a way which eliminates any negative impact on our environment.

- 1 Upper layer: cca 3,8 mm hardwood
- 2 Middle layer: 9 mm spruce core
- 3 Bottom layer: 2 mm spruce veneer
- F 6 layers of UV hardened lacquer – MagShield
